

RADSTER

DESCRIPTION

The radio fits perfectly into this bag and is securely held by an adjustable elastic strap which is passed over the radio and secured at the front. It can accommodate radios of heights from 100 to 230mm.

The adjustable shoulder strap has a reflective strip for increased visibility and safety. The strap is very versatile and includes 10 attachment points from which you can attach your microphone, torch, karabiners or other items essential for your job.

Microphone loop mount keeps your mic in the optimum location for instant communication.

An anti-sway strap is used on the radio holder to prevent excessive movement of the radio.
