

# WHEN VISION LOSS GOES UNCORRECTED, EMPLOYERS AND WORKERS FACE SERIOUS RISKS

WORKERS MAY EXPERIENCE IRREPARABLE EYE INJURY OR CATASTROPHIC BODILY INJURY

EMPLOYERS MAY PAY THOUSANDS (EVEN MILLIONS) IN INJURY RELATED COSTS

EMPLOYERS SEE DECREASED PRODUCTIVITY

## MAKE SURE YOUR WORKERS' VISION IS WELL PROTECTED

PROTECTING WORKERS' EYES - WHILE MAINTAINING VISION CORRECTION IS MORE IMPORTANT THAN EVER

### OVER THE GLASS SOLUTION

OVER THE GLASS (OTG) styles are an ideal solution for workers who wear corrective lenses; they're simply worn over RX eyewear. They're also ideal for the part-time workforce.

#### Tips for selecting OTGs workers want to wear:

**DON'T** underestimate the vital role that comfort, fit and style play in supporting compliance

**DO** check in with workers to make sure OTGs are comfortable, properly fitted and distortion free

WHEN SELECTING OTGS, WORKER ACCEPTANCE IS CRITICAL

#### SAFETY

- Put protection first: be sure they meet EN 166:2001 standard for personal eye protection
- Consider OTGs with anti-fog lens coating for a safe, clear view
- Look for OTGs with anti-reflective coating to reduce eye strain
- Be sure they are fitted properly over the individual's Rx eyeglasses to maintain protection

#### COMFORT & FIT

- Look for OTGs with innovative weight-distribution design to ensure all-day comfort
- Have workers try them first to ensure there's no optical distortion among the two sets of lenses
- Seek styles with adjustability features for a customized fit on various facial profiles

#### STYLE

- Look for lightweight, low-profile, modern styling
- Offer various colors
